

JET GLO®

JET GLO® POLYESTER URETHANE TOPCOAT FINISH

A proven performance coating in the aviation industry for more than 40 years, Jet Glo® Polyester Urethane is a multi-component topcoat designed for use on high performance general aviation and business jets.

Jet Glo® Polyester Urethane delivers a high-level combination of DOI, gloss retention and color brilliance. It is commonly used as an overall topcoat on high performance aircraft. The system provides a simple 1:1 mix ratio and is available in thousands of solid colors.

JET GLO® POLYESTER URETHANE TOPCOAT FINISH

COLORING THE SKY WITH SUPERIOR TECHNOLOGY

An innovative coating system designed to meet the demanding aviation market needs, Jet Glo® is a two-component polyester, solid-color urethane. It is a quality aerospace coating designed for overall base/topcoat application on medium and large size aircraft.

It also works well in other aerospace and high performance coatings applications where excellent appearance and superior durability are required.

Featuring superior aesthetics, Jet Glo Urethane features an extensive collection of bright colors, and is available in thousands of colors. It features a comprehensive set of color tools, available to make color selection simple.

SHERWIN-WILLIAMS JET GLO POLYESTER URETHANE PRODUCT BENEFITS:

- Proven durability and color retention
- Smooth spray application and UV resistance
- Unequaled, long-lasting, high-gloss appearance
- Superior Skydrol® and other hydraulic jet fluid resistance
- Salt and chemical resistant, corrosion resistant
- Unlimited color availability
