JETFLEX® ELITE

SHERWIN-WILLIAMS JETFLEX® ELITE BRINGS FIRST CLASS TO INTERIOR AIRCRAFT COATINGS

Using an interior cabin coating like JetFlex® Elite is a cost effective way to improve the passenger experience in the economy or premium class sections of the aircraft.

JetFlex Elite is an interior cabin coating product designed to offer sophistication and mood enhancement to aircraft interiors. Using proprietary pigments that are more responsive to LED lighting, these coatings create a subtle glow with highlights and colored shadows not seen with current interior cabin coatings. Color tones have been derived and inspired from Sherwin-Williams' most popular interior architectural lines.

Sherwin-Williams JetFlex Elite is recommended for interior applications and applies easily to plastic, metal and composite surfaces. Based off Boeing Qualified technology (BMS 10-83), it meets the most stringent requirements for stain and abrasion resistance as well as the FAR / JAR 25.853 regulations for burn, smoke and heat release. No clear coat is required, yet the coatings provides extensive durability against scratches, stains and mars.

SHERWIN-WILLIAMS JETFLEX ELITE PRODUCT BENEFITS:

- Meets the performance requirements of Boeing Material Specification BMS10-83N, Type II and Type III, Including flammability, yellowing resistance, and smoke stain resistance requirements
- Cool effect appearance
- Majority of colors available in a single stage option
- Available in satin finishes
- Excellent adhesion to plastic and metal
- Outstanding stain resistance
- High abrasion and scratch resistance
- Quick Drying and easy to apply
- Designed to meet FAR/JAR 25.853 regulations for burn, smoke and heat release
