OEM QUALIFICATIONS

MEETING THE HIGHEST IN OEM STANDARDS AND QUALIFICATIONS »»»

Sherwin-Williams provides innovative aerospace coatings systems designed to meet demanding aviation market needs. This means longer-lasting coverage and durability, giving aircraft more “in-service” time and allowing for longer periods between paint jobs.

Sherwin-Williams has received a number of SAE International’s Material Specification AMS 3095 for Airline Exterior Systems. This includes specification for its Jet Glo Express™ polyurethane topcoat and SKYscapes® basecoat-clearcoat systems, respectively, to both provide complete coating systems to the commercial aerospace MRO market.

THE CHOICE OF THE FLEET »»»

Leading commercial airlines, MROs and aircraft OEMs now utilize aerospace coatings from Sherwin-Williams throughout most aftermarket aviation settings.
