For chromic acid anodization,

Liquid masking has met their match.

MASK
5X
FASTER¹

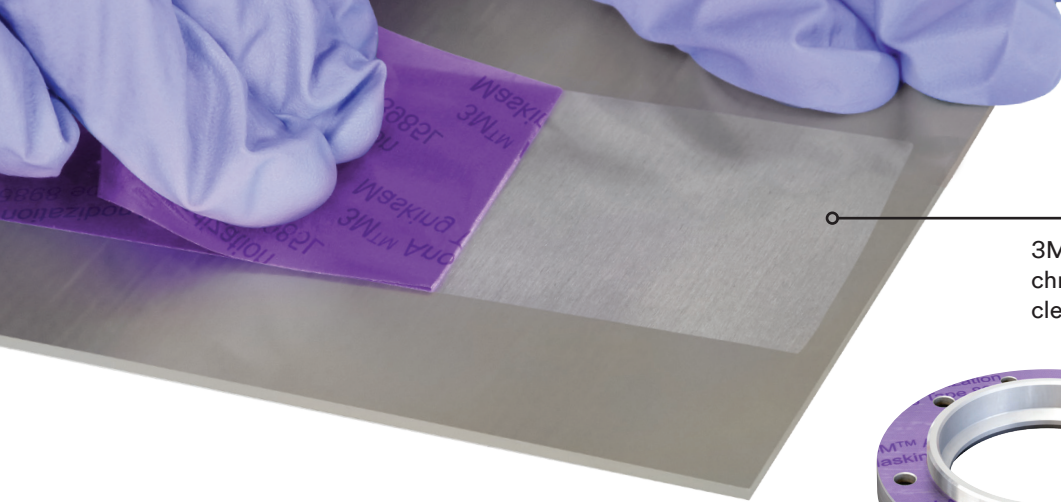

Introducing 3M™ Anodizing Masking Tape 8985L

- ▶ Can reduce labor time and associated costs up to 60%²
- ▶ Reduces the number of masking steps
- ▶ No messy chemicals or unpleasant odors
- ▶ Eliminates curing time of liquid masking
- ▶ Reduces the need for solvents during removal

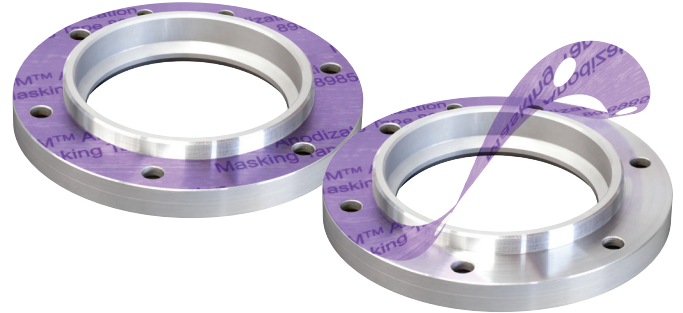

Try it today: BlendSupply.com/ExtremeMasking

3M Extreme Masking Solutions
Reliability • Performance • Productivity

¹Up to 5x faster to apply and remove than liquid masking. 3M internal data. ²3M internal data.

3M™ Anodizing Masking Tape 8985L survives chromic acid with excellent masking lines and clean one-piece removal.

3M™ Anodizing Masking Tape 8985L outperforms other anodizing masking solutions.

Are you ready to save up to 60%¹ on labor time and associated costs with your chromic acid (Type 1) anodization process? 3M™ Anodizing Masking Tape 8985L features excellent masking lines, clean one-piece removal and no curing time. Eliminate the pain of messy chemicals and unpleasant odors in your process with a masking tape that can take on extreme conditions and harsh environments.

- ▶ Designed to work with or without chemical film on a variety of aluminum alloys
- ▶ Transparent, colored tape with printed backing is highly visible for fast positioning and removal
- ▶ Lined for easy die cutting

Reliability

Get consistency and peace of mind with a non-silicone tape that won't introduce contamination in the production process.

Performance

Replace messy, labor-intensive liquids with a reliable tape solution that's built specifically for chemical resistance to chromic acid.

Productivity

Mask and de-mask up to 5x faster than liquids². Eliminate rework, extreme leakage or scrapped parts with excellent masking lines and clean, easy removal.

Product	Color	Adhesive	Backing	Total Tape Thickness	Chemical Resistance	Size	Blend PN
