Introducing Liquid Safety Solutions

Whether your business involves a factory floor, a lab, fleet operations or has environmental concerns, we have a **liquid safety solution** for your operation!

FyterTech Nonwovens is the largest integrated sorbent manufacturer supplying our distribution partners with the diverse line of liquid safety product solutions. What this means to our customers is that we have the reach, scope and help to help them be successful and grow their business wherever it takes them.

Reach - We are where you need us to be, around the corner or across the ocean. With nine U.S. operational centers and global distribution in 60 countries, we can deliver regional and targeted solutions for your business.

Scope - Multiple manufacturing sites allow us to effectively serve a variety of industries with targeted products and technologies. We manufacture our own sorbents (not just convert them). With our Essentials line, we now offer no minimum order quantity and a three-day (LTL) lead time on standard product from multiple distribution facilities.

Scale - Our footprint allows you to consolidate your orders and benefit from unparalleled product selection and field sales support.

You can bundle your sorbent, wiper, rag secondary containment and stormwater compliance products to meet minimums and reduce the number of suppliers you manage. Our nationwide sales force is there to support both you and your end users with product recommendations, regulatory knowledge, industry experience and our free site survey.

Spill Containment

- Drip Pans & Spill Containment Trays
- Spill Containment Accessories
- Temporary Leak Repair

Spill Kits & Stations

Industries Served

Facilities Management

Wipers, rags and absorbents play a critical role in facility safety, cleanliness and compliance. Each of these products can help you with your cleaning regimen; prevent slips, trips and falls; meet OSHA and EPA guidelines; and be prepared when that spill does happen.

Spilfyter Wiper Kits:

Cleaning and disinfecting is more important than ever. These wiper kits give you another tool for keeping your facility clean and safe.

- Easily add a wet wipe to your existing cleaning regimen, the kit utilizes whatever cleaning solution you already use.
- Control how saturated the wipes become based on your cleaner and application.
- Reusable bucket has an airtight lid to keep your wipes saturated, avoid contamination and reduce staff exposure to the chemicals.
- Wipers easily absorb the cleaning solution while remaining durable to handle your daily cleaning needs.

Wipers & Rags:

GT Series Wipers blend strength, absorbency and durability to give your operation a new workhorse for tackling everyday challenges.

- Created using a hydro-entanglement process that weaves absorbent cellulose fibers with polypropylene for additional strength.
- Engineered to be your new "Go To" wiper, the GT Series will withstand harsh chemicals and extended scrubbing
- Offers superior low linting and wipe dry properties

Shop rags come from a number of sources and are an economical, general purpose wipe and absorbent. Terry towels are ideal for cleaning and polishing.

High Visibility Sorbents :

Every time you deploy a "High Vis" sorbent to manage and clean your leaks, drips and spills, you are posting a warning sign that keeps your workers safe.

- High Vis sorbents have a durable, tear-resistant coverstock printed with a caution/warning sign
- Ideal for high traffic areas where the risk of slips, trips and falls is greater
- Offered in a variety of configurations including pads, rolls, dispenser packs, kits and wipers

Industries Served

Facilities Management, cont.

Absorbent Mats & Rugs:

Traction rugs are an easy to deploy, durable solution for preventing slips, trips and falls. Rugs cling to the floor creating a clean and safe working environment.

- Adhesive or cling backing adheres to floors but can still be re-positioned easily
- Traction rugs are a universal sorbent - absorbing a wide variety of oil and water-based spills
- Withstands heavy foot traffic and vehicle traffic including fork trucks

Essential Sorbents:

Universal sorbents are designed to absorb oils, coolants, solvents, water and more. They are perforated for flexibility and efficiency while offering great wicking and performance for all of your leaks, drips and spills. Socks can be molded around equipment for those troublesome problem areas.

Secondary Containment:

No matter what size or shape liquid storage container you have, there is probably a spill containment solution to make sure your facility is in compliance with EPA, SPCC and other regulations. These products should be a part of your "prevention first" best practices to limit the spread and issues associated with a spill.

Industries Served

Transportation

All modes of transportation require maintenance, repair and regular fueling, these operations use spill control products to keep their businesses clean, safe and compliant.

- Maintenance/Repair Bays
- On Location Refueling and Repairs
- Outdoor Liquid Storage
- Oil/Water Separator
- Fueling Vehicles
- Waste and Stormwater Runoff/Drainage
- Walkways – Slips, Trips & Falls Risk

Did you know? Per SPCC guidelines, fueling vehicles must be parked in secondary spill containment overnight.

General Automotive/Fleet Maintenance

Maintenance centers can benefit from a wide variety of spill control products to keep their facilities clean and safe. Whether you select our Spilfyter® branded products or choose from our Essentials line, our products are designed to efficiently manage and clean up spills from oil to anti-freeze to brake fluid.

Trucking

Truck fleets present unique challenges surrounding the sheer size of the vehicles and the mobile nature of the fleet. You don't always have the luxury of making

repairs or handling a spill in a controlled environment. Truck sized spill kits and portable containment berms allow you to properly manage leaks, spills and repairs while remaining in compliance.

Railroad Operations

These operations combine everyday fleet maintenance needs with the challenges of size and unique locations. The appropriate spill control solution reflects that same mix of standard and specialized products including sorbent pads, wipes and rags to railroad mats tailored to keep these operations in compliance.

Industries Served

Oil & Gas

A combination of standard product and our specialized oil only collars and rugs is a great starting point for tackling these specific problem areas:

- Leaking (or spilling) hydrocarbons at the point of drill head insertion
- Leaks and spills reaching the ground or platform during the drilling process
- Spills directly in to the waterway from marine drilling operations
- Pipeline leaks and repairs

Specialized sorbents come in several different configurations offering varying levels of durability, poly backing to prevent leaching in to the soil and and die cuts for a perfect wellhead entry point fit.

These operations also require standard spill control products and kits to manage many of their day-to-day needs that are not drilling specific:

- Generators
- Hydraulic equipment (forklifts, etc.)
- Oil drums
- Stocking warehouses
- Storm drains
- Drilling equipment
- Machinery & Vehicles
- Shared work spaces

Industries Served

Lab & Healthcare

Featured Products

Poly-Backed Sorbents

These skid-resistant, leak-proof pads help keep your work environment neat and clean and offer a three-ply construction resulting in a low-lint, high strength, non-slip product that keeps fluids from reaching the floor.

- Keeps surgical rooms safe and dry
- Place around scrub sinks that are likely to be high-traffic wet areas

Cleanroom Pads & Pillows

Cleanroom pads and pillows are perfect for hospital, laboratory and research environments. These low and extra-low lint sorbents will keep your work areas safe from

spills and chemical over-runs.

- Extra low lint pads provide for a 100% lint free cleanroom where airborne particles are prohibited
- Hazmat pads encased in tear resistant, low lint spunbond
- Static resistant

Lab Surface Soaker Pads

Heavy-duty soakers are made with a clear poly backing to prevent skids and chemical soakthrough, while absorbing 1 liter per square meter. Light-duty soakers are made with multiple layers of 100% recycled absorbent tissue with a

waterproof, skid-resistant and chemical resistant poly backing.

In addition, we offer many other products critical to the safe operation of laboratory and medical work environments:

- HazMat Sorbent Pads, Socks & Rolls - color-coded yellow for safety!
- Neutralizers & Classifiers
- Specialty Chemical & Neutralizer Spill Kits

Industries Served

Energy

The demand for power in this country continues to increase and plant managers are faced with increasing output while overcoming the day-to-day operation of an aging infrastructure. As equipment becomes less efficient, it naturally leaks and drips creating hazards and reducing productivity. While the nature of the plant may vary (coal, hydroelectric, wind farms, etc.), the equipment that translates the natural resource in to power still requires maintenance and repair. Which in turn needs sorbents and other spill control products to keep the operation clean, its workers safe and the business in compliance.

- Sorbent Pads & Rolls
- Spill Kits
- Socks & Boom
- Wipers & Rags

Industries Served

General Manufacturing

Very similar to our MRO Solution, manufacturing operations use spill control products to keep their facilities clean, safe, compliant and productive. Using these products to help you prevent slips, trips and falls; meet OSHA and EPA guidelines; and be prepared when that spill does happen. As with MRO, we'll focus on:

- Walkways
- Production Areas
- Shipping & Receiving
- Liquid Storage (Indoor & Outdoor)
- Environmental Impacts

Walkways

Susceptible to weather and the leaks, drips and spills from nearby equipment, walkway safety is key in preventing slips, trips and falls.

Production Areas

Equipment leaks and liquids spill, the condition of the work area and the liquids

involved in your process are a great place to start.

Liquid Storage

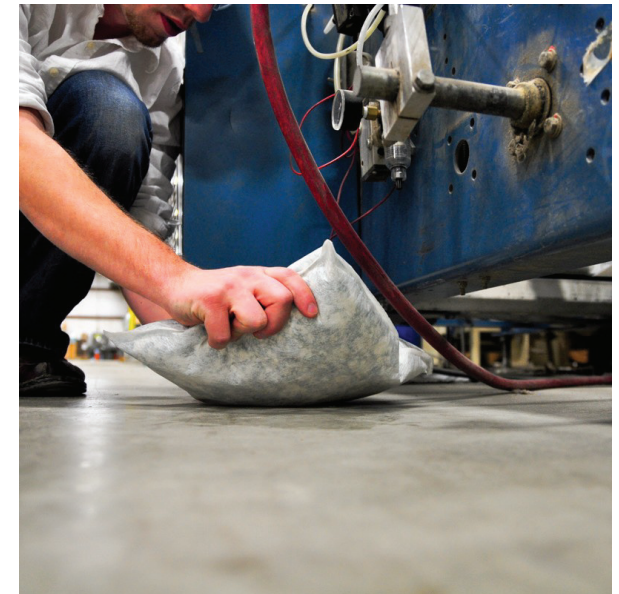

Indoor or outdoor, wherever you store the liquids that support your business, you need to manage leaks and control spills.

Shipping & Receiving

These busy areas need to be prepared for a spill and a sorbent that can stand up to heavy traffic.

Environmental Impacts

Nearby waterways, wastewater ponds, stormwater concerns? You need to manage your EPA compliance.

Disinfecting Wipe Kit Pro

LIQUID SAFETY SOLUTIONS
By FYZERTECH Nonwovens

Spilflyter® Disinfecting Wipe Kit Pro

Item #	Description	Count
94400E1	Disinfecting Wipe Kit Pro: Wiper Roll (500 Wipes) & Disinfecting Solution	Each
74491E1	Disinfecting Wipe Kit Pro Refill: Wiper Roll & Disinfecting Solution	6 Refills/Case

A Professional Solution:

- Tested and confirmed 30-day efficacy once mixed and added to the wipes.
- Features an EPA-approved, "M" listed disinfectant cleaner.
- 5 minute kill claim for pathogens (emerging or otherwise)

Features:

- Can be used to clean and disinfect all hard surfaces, equipment, tools and more.
- Wipes easily absorb the cleaning solution while remaining durable to handle your daily cleaning needs.
- Reusable bucket has a custom designed, airtight, flip top lid to keep your wipes saturated, avoid contamination and reduce staff exposure to the chemicals.
- Each conical roll pulls from the center - perfect for feeding wipers through the kit's bucket lid.

Included with each kit and refill:

128 E-FECTICIDE Disinfecting Cleaner

- One-step cleaning and disinfecting solution.
- EPA-approved for Emerging Pathogens (List "N" EPA Reg No. 6884-365-5449)
- Convenient, pre-positioned, easy-to-mix concentrate, each 2 oz bottle makes enough for one kit (64 CS)
- Professional quality-based solution tested in the wipe kit for 30 days.

Multi-Clean™

Now with a custom designed, airtight, flip top lid!

Essentials 2021 Pads & Rolls

LIQUID SAFETY SOLUTIONS
By FYZERTECH Nonwovens

Essentials: Pads & Rolls

Why Essentials?

- Stocked in Port Arthur, TX, Kent, WA, and Green Bay, WI
- LTJ Lead time is only 3 days (full truckload is 5 days)
- MQJ is only 1 bale
- Unbanded to protect your business
- Features our EZ Carry Bags (w/ez top)

Available in Universal, Oil Only & HazMat:

Essentials universal pads and rolls are all-purpose sorbents - perforated for flexibility and efficiency.

- Great wicking and performance for all of your leaks, spills and drips.
- Simple bond pattern increases strength and durability

Oil only sorbents are available in a variety of constructions to meet all of your application requirements.

- Absorbs all petroleum based liquids including oil, grease, kerosene and diesel fuel.
- Naturally repels water making them ideal for environmental clean up.
- Perforated except for the unbanded products.

Designed to warn users of potentially dangerous spills, HazMat pads and rolls are color-coded yellow for safety.

Essentials 2021 Socks/Boom/Pillows

LIQUID SAFETY SOLUTIONS
By FYZERTECH Nonwovens

Why Essentials?

- Stocked in Port Arthur, TX, Kent, WA, and Green Bay, WI
- LTJ Lead time is only 3 days (full truckload is 5 days)
- MQJ is only 1 bale
- Unbanded to protect your business

Socks & Pillows:

When your application requires greater flexibility, higher absorbency or a specific shape, these sorbents are ready for the job.

- Great wicking and performance for all of your leaks, drips and spills.
- Socks and pillows mold around equipment and in to hard to reach places.
- Oil only product selectively absorbs petroleum-based liquids leaving water based fluids behind.
- HazMat socks and pillows are color-coded yellow for safety.

Boom:

Marine-based spills require sorbents specifically designed for the challenge. Booms from a migration barrier preventing the spread of hydrocarbons while absorbing the petroleum-based fluids from the water.

GT Series

Spilflyter® Wiper^{GT} Series

All Purpose and On Target: The Wiper^{GT} Series from Spilflyter blends strength, absorbency and durability to give your operation a new machine for tackling everyday challenges.

Offering three quality levels for a variety of wiping applications, GT Series wipers are a tough clean and degrease alternative to shop rags.

GT Series wipers are created using a high-entanglement process that weaves absorbent cellulose fibers with polypropylene for additional strength.

Engineered to do your "job" wipers, the GT Series will withstand harsh chemicals and extended scrubbing as well as offering superior low tearing and wipe dry properties.

LIQUID SAFETY SOLUTIONS
By FORTERTECH KNOWLEDGE

Cleaning & Disinfecting Shared Workspaces

Prefer a Wet Wipe?

75% Alcohol Wet Wipes

- Antibacterial hand and surface wipes kill 99.99% of viruses and bacteria
- CDC states that alcohol solutions of at least 70% alcohol may be used to disinfect against coronaviruses

Spilfyter® Disinfecting Wipe Kit Pro

- Includes a one step disinfecting and cleaning solution EPA approved for emerging pathogens ("N" list)
- Features a compact, airtight wipe roll that feeds through the new flip top lid!

Prefer to Spray & Wipe?
Try these wipes that come with their own dispenser:

- Spilfyter® GI Series HydroSpan Wipers**
 - Woven with a blend of cellulose and polypropylene for additional strength
 - Tough, all-purpose workhorse wiper
- Spilfyter® Spunlace Wiper Roll to A-Box**
 - Durable, non-losing wiper that stays strong when wet
 - No chemicals or binders, won't break down in solvents

The realities of cleaning a business during a pandemic has certainly blurred the line between janitorial and facility safety. Disinfecting is no longer a word reserved for restrooms or food prep. Every facility has hot spots — manufacturing, office, retail, medical, anywhere people gather to work, shop, relax or get the care they need.

So how will you manage the disinfecting and cleaning of your "high touch" areas?

- Restrooms
- Entrances & Exits
- Cafeterias, Food Courts & Break Rooms
- Workstations
- Meeting Rooms
- Transaction Areas

LIQUID SAFETY SOLUTIONS
By FORTERTECH KNOWLEDGE

Solution: Railroad MRO

Solutions For Railroad Maintenance, Repair & Fueling

Railroad operations combine everyday fleet maintenance needs with the challenges of size and unique locations. The appropriate spill control solution reflects that same mix of standard and specialized products. From sorbent pads, wipes and rags to railroad mats tailored to keep these operations in compliance, ForterTech Nonwovens has the Liquid Safety Solutions you need to keep your rail operation clean, compliant and safe.

Railroad Mat:

- Seed to fit perfectly inside and outside of the railroad tracks.
- UV resistant needle-punch cover stock offers high durability and extended use.
- Highly absorbent meltblown polypropylene middle layer absorbs any oil or hydrocarbon while repelling water.
- Barrier backing protects the environment, preventing absorbed liquids from leaching in to the soil.

GI Series HydroSpan Wipers:

- GI760W 9"X16.5" White Wipers, 126/Dispenser Box
- GI734W 12"X16.5" Heavy Duty White Wiper (GI70/Roll)
- GI747E 12"X13" Industrial Grade Blue Wiper (475/Roll)

ORC Wipers:

- WB8000C25 Reclaimed Cellulose Rags
- WB8010C25 Reclaimed Cellulose Rags

Reclaimed Rags:

- WB8000C25 Reclaimed Cellulose Rags
- WB8010C25 Reclaimed Cellulose Rags

Essentials: sorbent pads and rolls are ideal for daily leak, drip and spill management, and perforated for flexibility and efficiency.

Our GI Series HydroSpan Wipers blends strength, absorbency and durability to give your operation a new workhorse for tackling everyday challenges.

Spilfyter® Wipe Kit

This Simple To Use Kit Is As Easy As:

- Load the dry wiper roll into the re-usable bucket.
- Pour your chosen cleaning solution over the roll of wipers.
- Thread the first wiper through the lid and close.

You're Ready To Go!

- Easily add a wet wipe to your existing cleaning regimen, the kit utilizes whatever cleaning solution you already use.
- Control how saturated the wiper becomes based on your cleaner and application. We recommend 64 oz of solution but encourage you to test performance with your chosen cleaner.
- Reusable bucket has a custom designed, airtight, flip top lid to keep your wiper saturated, avoid contamination and reduce staff exposure to the chemicals.
- Wipers easily absorb the cleaning solution while remaining durable to handle your daily cleaning needs.
- Each coless roll pulls from the center - perfect for feeding wipers through the sanitizing kit bucket lid.
- Ideal for surface cleaning and sanitizing as well as removing soil, oil and grease.

Wipes & Rag Offering

How important is metal detection when buying reclaimed rags?

The answer depends on how long you want to keep that customer you worked so hard to get!

Selecting the cheapest rag option sometimes gives you unexpected and even dangerous results. Reclaimed rags come from a lot of sources — foreign material is occasionally recycled in to rags after its original use.

What else gets tossed in or caught up in the pile of material when being shipped off to the recycler? Razor blades, needles, pins, nails... and yes, even knives. Plus the rag itself may have metal buttons, zippers or buckles. Our studies indicate that as much as 5% of all reclaimed rags contain detectable metal. Don't let your customer be the one who opens that box of rags.

All reclaimed rags are scanned for metal and in most cases scanned twice!

Spilfyter® Wiper Options:

- Airtight wipers
- ORC wipers
- Spunlace wipers
- Hydrospan wipers
- Scrim wipers
- Delicate task wipers
- Food service wipers

Sales Strategy

People to Target:

- EHS Officers
- Purchasing
- Safety Directors

Sales Approach

- Higher end incident prevention
- EPA fine prevention
- Slip & Fall prevention
(\$10k/incident, etc)
- We do not go to market as the cheapest, we sell our expertise and the spectrum of product across industries.

What sets them apart

- Spill control
- Essentials (in-stock quick ship items)
- Facility in TN - stock here, ability to bundle
- They metal scan every reclaimed rag
- The risk here is that shards of metal or knives can get dropped in the boxes of reclaimed rags. They scan multiple times to prevent this, unlike many competitors.
- Consistency and quality, they don't mix in cheap products.
- Bundling - ship it all at one time

Competitors

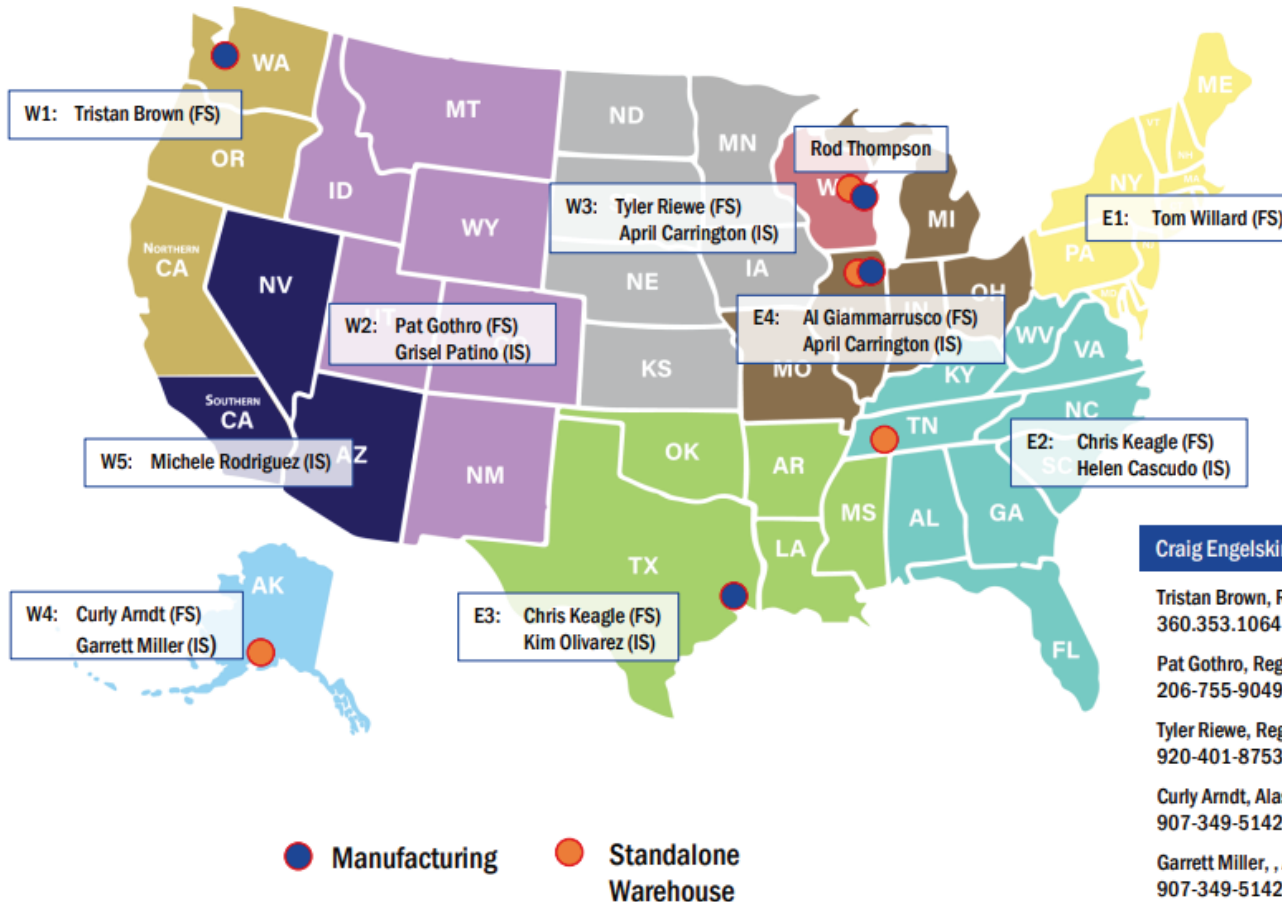

- New Pig
- SPC Brady

Industries

- General Industrial
 - Manufacturing
 - Oil & Gas
 - Anything that would need spills cleaned up
 - Paint & fine finishing
- Marine
- Environmental
- Janitorial
 - Safety
 - Hardware (local stores)
